Introduction

Thank you for your support and partnership during these unprecedented times. We appreciate the hard work and dedication of everyone in our community to help ensure the safety and well-being of our students, families, and staff.

We have been developing plans and using alternative delivery methods to provide curriculum, instruction and assistance to students and families. We want to maintain transparent dialogue with families in regard to mandatory policies and procedures.

In returning to school, we want you to know that our community's safety is first and foremost. We want you and your children to feel like they are coming back home. In order to do this, and with everyone's personal safety in mind, we are taking great precautions in preparing the school for our return. We will continue to adjust all of our protocols to comply with the [Toronto Public Health guidelines](#) as relevant information is made available. *Although this is what we have been planning, these are subject to change based on developing protocols.*

Parents need to have some predictability and routine in their family life to arrange childcare, home life, and work commitments while knowing that their child is receiving academic instruction in a safe environment. Given the pandemic situation, flexibility, patience, and understanding will be needed as we work out solutions to the various challenges with a return to school. Our preference is for students to attend school five days a week, learning through conventional delivery with school every weekday, with class sizes that reflect current regulations, with regular social interaction and extra-curricular activities. However, it is critical to balance the risk of direct infection and transmission of COVID-19 in children with the impact of school closures on their physical and mental health. Current evidence and experience support the concept that children can return to school in a carefully structured manner that protects children's health and minimizes risks from a public health perspective. [Click here](#) for SickKids recommendations for safe school reopening.

Relationships between AHS and local public health units will be crucial to navigate the complex and evolving COVID-19 environment, planning and reopening schools, and addressing other child health issues that emerge.

This document parallels the guidelines published by [Ontario's Ministry of Education on June 19, 2020](#), and is adapted from the CIS Guidelines, published on July 7, 2020.

Webcam Learning Support

We strongly believe that learning in the classroom environment provides students with a host of developmental benefits and are **expecting full attendance from students**; however, we understand that this may not be possible for all of our students this year due to medical exemptions. Such medical exemptions include, but are not necessarily limited to, pre-existing chronic health conditions, presentation of any COVID-19 symptoms, and/or the need to self-isolate. To accommodate, we have outfitted each classroom with a webcam so that students will have **access to instructional lessons as provided by teachers in their homeroom classrooms throughout the day**.

It is our belief that in-person learning is the best approach to education providing students with a holistic learning experience and opportunity for social development. We are reminding parents that at this time webcam learning support is not a one-for-one replacement to in-person learning.

For more information about Webcam Learning, please review our [Webcam Learning FAQs](#).

Cohorting and Distancing

In order to prioritize student and staff health and safety, there are two key aspects of health advice that we will be following: "distancing" and "cohorting".

"[Distancing](#)" refers to the advice that individuals should avoid close personal contact and maintain separation for any prolonged encounters. Physical distancing between students, cohorts, staff and essential visitors will be encouraged. Re-orienting the school's physical environment to support physical distancing may reduce the reliance on individual-level behavioural measures that may be impractical, particularly for younger students.

"[Cohorting](#)" refers to minimizing the number of students and teachers any individual comes in contact with, and to maintaining consistency in those contacts as much as possible. The purpose of cohorting is to limit the mixing of students and staff so that if a child or employee develops infection, the number of exposures would be reduced. This supports [contact tracing](#), and helps prevent wide-spread shutdowns in the event of an outbreak. Classes

will be cohorted, particularly for the younger age groups, so that students stay with the same class group and there is limited to no mixing between classes and years. This model recognizes that for younger children, close interaction, such as playing and socializing, is central to child development.

Preparing the Site

Background Information

COVID-19 is spread through direct contact with droplets spread by coughing and sneezing. Infected droplets on surfaces can be spread by someone touching the droplets and then touching their mouth, nose, or eyes. Scientists believe that the droplets on surfaces may live for 3 to 72 hours, depending on the surface. Cleaning with soap and water or with disinfectants will typically eliminate the risk of spread.

School Signage and Markings

Signage on walls and floors will help students maintain physical distancing from one another. The signage is posted at entrances to classrooms, school entrances and exits, large spaces such as the learning commons, and meeting spaces such as the main office, principal or vice-principal offices, outside elevators, and in the resource room. Click the links below for examples of signage to raise awareness about COVID-19 and encourage healthy behaviours:

- [How the virus can spread](#)
- [How to protect yourself](#)
- [Wash your hands](#)
- [Cover your cough](#)
- [COVID-19 Fact Sheet](#)

Playgrounds

Playground equipment will be used by one cohort at a time. Staff may choose to use pylons or other means to help students maintain physical distancing from different cohorts in the yard. Students who use the playground equipment will be required to clean their hands before and after outdoor play and playground use.

Access to playground equipment will be cleaned and disinfected before and after use by each cohort. There will be a low threshold to close play structures if there are confirmed cases of COVID-19 in a school.

Personal Protective Equipment (PPE) and Masks

In accordance with Toronto Public Health and the City of Toronto bylaw which requires that a mask be worn by everyone over the age of two years in all publicly accessed indoor spaces, masks will be mandatory for ALL students (Nursery – Grade 8), faculty, and visitors, while exemptions may apply on a need basis.

Students, especially those in Nursery – Grade 3, will receive gentle reminders and positive encouragement to practice safe and healthy mask, and hand, hygiene throughout the school day.

[Click here](#) for more information on how to properly wear a cloth mask.

Plexiglass Separation

Portable Plexiglass will be placed in high traffic areas where distancing may be problematic, such as at the front reception area of the main office, the learning commons circulation desk, and guidance reception areas. Plexiglass dividers have been installed on round tables in the Bet Hayered classrooms to provide students with their own protected space at the shared tables. Where distancing can be maintained, plexiglass is not needed. All plexiglass dividers will be disinfected regularly.

One Way Directional Signage

Separation markers are placed to signal one-way direction within the school. This will assist in maintaining physical distancing for everyone in the school.

Thermal Thermometer

One thermal thermometer has been purchased for each school. This is only to be used with the permission of a parent/guardian when there is concern that a student may be ill and is being sent home. Temperature checks on their own are not reliable indicators of possible COVID-19 infection.

Hand Sanitizer and Disinfectant Wipes

Hand sanitizer and disinfectant wipes are widely available at each branch. Hand sanitizer is available in all classrooms that do not have available soap and water for proper hand hygiene purposes. While the sharing of equipment is discouraged, where equipment must be used by more than one student, disinfectant wipes will be made available.

Ventilation

Cleaning and disinfecting will take place away from students. Where possible, bringing fresh outdoor air into the school will be completed by caretaking staff. When possible, classes will be held outdoors where ventilation is improved.

Outdoor Space for Recess

Recess will be staggered based on the availability of supervisors. Where possible, areas will be designated outdoors for each cohort to minimize contact with other students from outside the instructional cohort. Principals have developed a schedule and routine that allows for students to maintain appropriate physical distancing while still having an opportunity for mask breaks, fresh air and physical activity.

Isolation Room/Area

There is a designated isolation room/area at both campuses. This room/area will be used for the temporary placement of any student that becomes ill during the day. An isolation kit containing staff/student PPE for illnesses, has been provided to the front office.

Social Emotional Learning

Each staff member has prepared learning activities that foster social emotional learning and that will assist all students with coping skills.

Outdoor and Non-Classroom Space

Staff are encouraged to take advantage of outdoor space for instruction where feasible.

Doors

Where possible, and safe to do so, classroom and office doors will be left open during the day to minimize the number of students or staff that need to touch door handles upon entering or exiting a room..

Outbreaks and Return to Distance Learning Platform

There is always the possibility of a return to distance learning if an outbreak forces a school to be closed for a lengthy period of time. In preparation for continuity of learning, we have been extensively preparing for distance

learning. Professional Development has been provided to all staff to further enhance their abilities.

Preparing for Staff

Staff Accommodations

We will be continuously updating appropriate accommodations for staff (i.e. additional PPE, space, etc).

Team Approach

School-based solutions have been implemented to support the many staff and student family and health challenges. Students are each assigned to their General Studies and Judaic Studies classroom teacher. If we are required to move to an adapted or distance learning environment, students will be supported.

Personal Protective Equipment

Teachers may use their own masks. Masks (1 disposable per day) and face shields are available for all teachers and other school-based staff, if needed. All teachers and school-based staff are required to wear masks, with reasonable exceptions for medical conditions.

Equity Considerations

Staff have spent time preparing for differentiated supports for students with special needs that require additional support. Where known, the Principal will inform staff of challenges for distance learning for students where home support is not always possible, for a variety of reasons. Challenges exist, and collectively we will provide the necessary resources to each student to assist them in reaching their potential.

Hygiene Instruction

Hygiene routines will be reinforced regularly. Each class has information to reinforce the importance of [handwashing](#), avoiding touching one's face/eyes/nose/mouth, and the importance of [coughing and sneezing](#) into one's sleeve if a tissue is not available.

Staff Gatherings

Staff will promote physical distancing amongst one another as role models for students. Staff will not gather in large groups until this restriction is removed. Teachers are encouraged to establish virtual staff rooms and not congregate before arriving in or returning to their classrooms.

Sharing of Resources

Staff will limit student sharing of materials and resources in class. Adequate supplies for instructional units are provided to each student, and where it is not practical to give each student their own resources, then the shared equipment will be cleaned or disinfected between use. This may involve the provision of disinfectant wipes in each classroom setting.

Staff – Health and Safety Guidelines

During the PD days before the start of the school year, staff reviewed advice from Toronto Public Health on the proper use and care of PPE and hygiene that staff will follow when working in schools during the pandemic. Additional guidance has been provided to staff that work in multiple facilities, such as staff from the planning and facilities department.

Illness

Staff who have any signs of illness must stay home. Staff who have been in contact with someone who has tested positive with COVID-19 must follow Toronto Public Health directions.

Screening Procedures for Staff

All staff and students **must** self-screen via the screening app daily, and those who suspect they may have [symptoms](#) must stay home and should seek testing and call Toronto Public Health. The screening app will identify staff who have not self-assessed. In these cases, staff will not be allowed in school until the assessment has been completed. Some staff may need to self-identify a health concern or a health concern of a family member who may prefer an assignment that does not regularly bring them into contact with students.

It is not staff's responsibility to screen students for illness; however, if a staff member is concerned that a student is exhibiting signs of illness, this will be reported to the school administration. If a student voluntarily shares that they or a member of their family has COVID-19 symptoms or a positive test, this will also be shared with the school administrator. If a symptomatic

individual tests positive for COVID-19, they should continue to remain in isolation at home and follow the directions of their local public health unit.

Technology

We will continue to offer professional learning opportunities for staff to ensure that they are positioned to use digital tools effectively. Based on parent feedback, one area of growth is to move to a more centralized communication platform so that students/parents do not need to access multiple platforms for each educator's class. Before the start of the school year, PD days were used to prepare for movement between in-person instruction and possible distance learning if needed

Preparing for Students

Initial Return

During the initial return to school, staff will provide activities that acknowledge the social emotional impact of students and their families during the initial stage of isolation. A focus on the whole student will be the priority for the return to school. Counselling support will be available to assist with the mental health needs of students.

Communication

Feedback during the first phase of distance learning provided input on areas of possible improved communication. One such area was the desire to have a minimal number of locations for parents/students to check for work assigned during distance education. We will try our best to ensure consistency between classes.

Screening Students

- All students and staff are required to self-screen before arriving at school. ParentLocker has been implemented as a COVID-19 health screening and tracking app to be completed on a **daily basis by 7:45 a.m.** Within seconds of completing the daily health survey, students and staff will receive a response of cleared or not cleared to come to school.
- The daily health survey must be completed in the morning of each day that your child(ren) will be attending in-person classes. Due to the need to have up-to-date and accurate reporting of your child(ren)'s

health condition on a given school day, health survey responses cannot be submitted in the evening in advance of the upcoming school day.

- Health survey responses submitted in ParentLocker are updated frequently and are automatically sent to the school. Teachers and administrators have the ability to see who has and has not submitted the survey, and who is not cleared to come to school.

According to Toronto Public Health (TPH), some people may experience mild or no physical symptoms. The onset of symptoms can take up to 14 days after exposure to COVID-19. **A not cleared response will be received if you have answered YES to any of the following symptoms:**

- Fever
- Chills
- New or worsening cough- continuous, more than usual, not related to other known causes or conditions (for example, COPD)
- Barking cough, making a whistle noise when breathing - not related to other known causes or conditions
- Shortness of breath or difficulty breathing - not related to other known causes or conditions (for example, asthma)
- Sore throat or difficulty swallowing - Not related to other known causes or conditions (for example, seasonal allergies)
- Runny nose, stuffy or congested nose - Not related to other known causes or conditions (for example, seasonal allergies, being outside in cold weather)
- Lost sense of taste or smell- Not related to other known causes or conditions (for example, allergies, neurological disorders)
- Pink eye (conjunctivitis) - not related to other known causes or conditions (for example, reoccurring styes)
- Headache that is unusual or long lasting - Not related to other known causes or conditions (for example, tension-type headaches, chronic migraines)
- Diarrhea, nausea/vomiting or abdominal pain - Not related to other known causes or conditions (for example, irritable bowel syndrome, anxiety in children, menstrual cramps)
- Muscle aches that are unusual or long lasting - Not related to other known causes or conditions (for example, a sudden injury, fibromyalgia)
- Extreme tiredness that is unusual (fatigue, lack of energy) - not related to other known causes or conditions (for example, depression, insomnia, thyroid dysfunction)
- Falling down often

- For young children, sluggish or lack of appetite
- Temperature over 37.8 degrees Celsius (100.0°F)

In the event that the Ministry of Education or TPH adds or removes symptoms from this list, ParentLocker will be updated accordingly.

Attendance

Student attendance will be taken for all students that arrive in school. Online attendance will also be recorded. Students will not be penalized academically should they choose not to attend in-person sessions. Attendance records are being monitored for patterns or trends (e.g. students and staff in the same group or cohort absent at the same time or over the course of a few days).

Management of Illness, Symptoms, and COVID-19

The Ministry of Education has outlined the following back-to-school scenarios and, in accordance with TPH, its recommendations for the management of illness, symptoms, and/or COVID-19 in these scenarios:

- students, staff, or other members or visitors to the school community become ill during the school day and on school premises, including before and after care affiliated with AHS
- individuals closely related to a school community, such as parents, bus drivers, or members of a student's or staff member's household, who test positive for COVID-19 outside of the school
- students, staff members, or members of the school community who are regularly in the school, who inform the school that they have tested positive for COVID-19

For further details, including the recommended actions for teachers, principals, parents, and students, please refer to the [Operational guidance: COVID-19 management in schools](#) as updated and published by the Ministry of Education.

Student Illness and Management of Students with Possible COVID-19

If a student becomes ill during the day and/or if they exhibit signs of illness, they will be required to enter into an isolation area as designated by the school until their parent or guardian can pick them up. The area will be flagged as closed until it can be cleaned, and sanitized after the student leaves the school.

All staff and students who are experiencing new or worsening symptoms consistent with COVID-19 must not attend school and should seek appropriate medical attention as required, including getting tested at a COVID-19 testing centre. Staff and students feeling sick should remain at home while waiting for test results. If a symptomatic individual tests positive for COVID-19, they should continue to remain in isolation at home and follow the directions of their local public health unit. Persons who test positive may not return to school until they are cleared according to public health guidance. Tests that are retested negative (after an initial positive test) can return to school once they are symptom-free for 24 hours.

Areas used by the student who is ill will be closed off and the area should not be used before cleaning and disinfecting can take place.

Toronto Public Health will provide directions to the school Principal about what information to share with parents of other students in the class or school when there is confirmation of a positive COVID-19 result.

COVID-19 School Case and Contact and Outbreak Team

In the event that someone does contract COVID-19 at the school, TPH Communicable Disease Investigators will conduct an investigation and provide recommendations in accordance with public health guidance.

Confirmed Cases of COVID

When a student or staff member has been diagnosed as positive for the COVID-19 virus, the school will follow the directions of Toronto Public Health. This may require one or multiple classes to move to a distance learning model and/or may require the school to be closed to in-person instruction for a length of time necessary, based on the time recommended by Toronto Public Health. Students who tested positive for COVID19 must bring medical clearance before being allowed to return to in-person instruction.

Request for School Information

In the first weeks of school opening, TPH will be collecting some information about our school community. Collecting this information proactively will assist TPH in responding to any COVID-19 cases or outbreaks. A TPH COVID-19 School Liaison Public Health Nurse will collect this information by telephone or a survey.

Return to School

It is recommended that:

- While an individual suspected to have COVID-19 is waiting for test results, they must be in isolation and cannot attend school in person. The individual can attend school virtually if they feel well enough to participate.
- Individuals who have had a COVID-19 test because of symptoms, but who test negative, should not return to school until at least 24 hours after their symptoms have resolved.
- Individuals who have traveled out of the country should isolate for 14 days.
- Where a student or staff member has tested positive for COVID-19, the local PHU will be in contact with the school to provide further direction on returning to school.
- Barriers to return to school, such as requirement of medical notes or proof of negative tests, should be avoided.

The information presented here has been collected from reputable sources, including the Ministry of Education, Toronto Public Health, and SickKids.

Please refer to the following links for further details:

[Operational guidance: COVID-19 management in schools](#)
[Guide to Reopening Schools](#)
[COVID-19: Guidance For School Reopening](#)

Students with Health Conditions

Some students will not be able to take part in the in-person component of school due to their chronic health conditions. For this group of students, the school has invested in providing webcams, so that students have access to instructional lessons as provided by teachers in their homeroom classrooms throughout the day.

Vaccinations for Students

Clinics in all schools are suspended for the fall of 2020. Students in grades 7/8 can still receive their vaccinations for Hepatitis B, HPV and Menactra at TPH community clinics later in the fall, by appointment. We will notify you when these clinics open.

Reviews of immunization records for all students are also cancelled for the remainder of the year. Routine vaccinations are an essential health service, and are available from a student's health care provider. Vaccines provide

individuals with protection from non-COVID-19 diseases. Students visiting their health care providers for scheduled or urgent visits should not delay vaccinations at this time.

School Operations

Student Reminders

Regular reminders will be provided to students on proper hygiene. Students will be asked to wash their hands before and after eating, and when returning from outside, and before and after using the washroom. All students (Nursery-Grade 8) are required to wear masks. Students will be taught the proper use of a mask, but are encouraged to adapt to their masks prior to the start of school. Student belongings should be taken home each day to be cleaned as needed.

Eating and Drinking at School

Students and staff will be performing proper hand hygiene before and after eating. Students should bring their own drink bottle that is labeled, kept with them during the day and not shared. Water filling stations can be utilized, but the water fountain will not be used. Students will bring their own individual meals and snacks, and the “no food sharing” policies will be reinforced.

Lockers and Cubbies

Lockers at Danilack will not be distributed at the start of the school year. Students are expected to bring basic school supplies with them for the first day of school. Lockers may be distributed later on in the year as the weather gets colder, only to store boots and coats.

Student Transportation

[Transport Canada’s recently issued Federal Guidance for School Bus Operations](#). To the extent that physical distancing may not be possible, the use of non-medical masks for all students (Nursery- Grade 8) are required on school vehicles. Exceptions will be made for students with medical conditions or special needs that prevent masking. Students of the same household and the same cohort will be encouraged to share seats.

We have requested cleaning protocols for frequently touched surfaces (e.g., handrails, seatbacks) at least twice daily. There is alcohol-based hand

sanitizer available on vehicles. Physical and visual cues may be used on school vehicles to reinforce health and safety measures (e.g., seat markers on the bus to indicate how students may safely observe physical distancing). Physical distancing will be maintained during loading and unloading through specific measures (e.g., seating arrangement fills bus back-to-front or front-to-back to reduce student interaction). We encourage active forms of travel or private transportation by parents and caregivers when possible. If car-pooling, please consider using masks in the car.

To accommodate some families' transportation needs, a bus route from Bathurst Street and St. Clair Avenue to Hurwich has been added.

School Hallways and Stairways

We have designated traffic flow one way in all school hallways.,

Classroom Setup

Students will remain in the same consistent seat in the class as much as possible. This area is their personal space and should be as far away from the nearest student as practical. Classroom design will vary from teacher to teacher, but the same goal remains to give everyone their own personal space. Physical barriers such as unused desks, plexiglass or visual markings, will be used to assist with the separation. All student belongings are kept in their personal area, ie. no use of shared spaces such as coat racks or cubbies. Desks and tables should not be removed from the classroom; however, the same desk/table will be used by the student each day.

Nursery and Kindergarten Classrooms

While physical distancing may not be as practical for four and five year-olds, the rule of no physical touching will be reinforced. Activities will be designed for small groups, and furniture and playing areas will be used to help maintain physical separation. Plush toys will be temporarily stored. Toys and manipulatives will be reduced where possible while still providing for students a wide variety of play-based learning.

Adapted Assessment

To the greatest extent possible, assessment, evaluation and reporting activities will proceed as usual, with a focus on the achievement of overall expectations and the primary purpose of assessment and evaluation being to improve student learning. Report Cards and Progress Reports will be provided

for all students, including those who may plan to only participate through remote learning.

Refresher Learning

The goal of “Refresher Learning” is to recognize what students have learned from their experience during the school closure period and to ensure students are well supported for their ongoing learning in the next year. There are various supported components for Refresher Learning, including: providing resources for educators on how to support student well-being, providing content review for students integrated throughout the school year at key instructional times to ensure students have fundamental building blocks before each new unit.

Some students, such as those with learning disabilities, may require additional time and support to close the gaps in their learning. We are planning for early transition visits for students with special education needs and mental health needs to help re-familiarize them with the school environment and establish routines.

Support for Special Needs and the Centre for Diverse Learning

Students with specialized education plans experience unique challenges during this time, and additional support from the CDL is in place to help these students learn and thrive as we reopen.

Entry Requirements

School entry times are staggered, and multiple entry doors will be used to allow for physical distancing. Students will be required to wash their hands as they enter the school.

Drop-off/Dismissal Requirements

Procedures that support physical distancing, discourage congregating and separate cohorts as best as possible have been put in place and communicated prior to reopening. School drop-off/d dismissal times are staggered, and multiple exit doors will be used to allow for physical distancing to occur. Drop-off and dismissal of students will happen outside the school.

School Supplies and Equipment

Students should have their own school supplies, and any shared school supplies will be disinfected after each use. If a device such as a Chromebook is being scheduled for alternative use, it must be wiped down with sanitizer

wipe before changing users. Disinfecting wipes and/or an isopropyl alcohol solution will work on electronic devices.

Experiential Courses

At this time, specialty classes will still be offered to students with modifications made where necessary to ensure that health and safety guidelines are adhered to. This specifically refers to the ability to be safely physically distanced from one another and/or the ability to thoroughly disinfect any shared equipment. Due to the specialized resources, materials, and/or equipment that many of these classes require for active participation, students who require webcam learning support may experience limitations participating in these classes.

Music

The safety of students and staff require additional procedures for music classes, choir, glee club and band, including the disinfection of instruments and classroom layout considerations. When practicing singing for special events when the majority of the class is encouraged to sing, classes will be held outside when weather permits. Full precautions will be followed based on the [Ontario Educators' Association - Framework for the Return to Music Classes](#).

Physical Education, Science, The Arts, and Technology-based courses

These courses will continue with the educator putting in place curriculum modifications to ensure that physical distancing is maintained. The sharing of equipment is not normally permitted. Where equipment is needed for different classes, the equipment must be sanitized before use. Physical education classes may be conducted outdoors, where possible, weather permitting.

Washrooms

Washrooms have been marked off to ensure physical distancing when multiple students are in the washroom at the same time. Signage has been placed inside the washroom, reminding students of both physical distancing and proper hygiene. Washrooms will be cleaned throughout the school day and again each evening. We have implemented a tracking system for staff to record the time and frequency of cleaning. Some sinks have been replaced with touchless systems.

Classroom Carpets

Full groups should not be gathering on shared carpet areas. Carpets can remain where they are used for regular foot traffic; however, students should not be sitting on carpets unless they are able to maintain the same location on the carpet and can do so while distancing from the next student.

Before and After Care

Before and after care programming (AHSCare) is available for those who need it and students in these programs will be part of two cohorts. The school will ensure that student lists and information are maintained and readily available to be provided to public health for contact tracing purposes. Students will be encouraged to collaborate online for clubs and after school activities.

AHSCare will follow the health and safety protocols as outlined in this document.

- The following changes to AHSCare have been put into place to keep our students and staff safe:
Students will be divided into age appropriate cohorts with fully qualified supervision;
- Distancing between cohorts will be maintained;
- A strict regimen of cleaning and disinfecting will be followed;
- To comply with health and safety guidelines, no food will be served to students. Parents are asked to send their child(ren) with nut-free, kosher, breakfast and/or snacks.

All students attending Before Care will be required to complete the daily health survey in ParentLocker **at least 15 minutes before** arrival at school. Each child in your household must be cleared for attendance in ParentLocker to participate in Before Care.

Visitors, Volunteers and Parent Access

Visitors, volunteers, and parents access will be extremely limited on school property. Parents may not enter the school with the exception of a school approved appointment.

Fire Drills

Practice drills will continue. Classes will move throughout the building while maintaining physical distancing between students in the classroom, hallway and at all exits. Each Principal has reviewed with staff where to go in case

there is a real emergency, and the school needs to be evacuated. Locations on the school playground or field have been identified and will allow for distancing between cohorts to be maintained.

Lockdown Drills

Physical lockdown drills will not take place during COVID-19. A drill will take place that reviews the procedures in the case of a real life-threatening situation. The modified practice drill will adhere to physical distance requirements.

Celebrations, sports and extracurriculars

COVID-19 has resulted in the cancellation or delay of milestone events to recognize student achievement, and will impact the kinds of sports and extracurricular activities that can safely be offered. Recognizing that these events and activities are an integral part of the school experience for many students, we are hoping to resume sports and extracurricular activities that can safely continue based on input from local medical officers of health.

As set out in the [Conference of Independent Schools of Ontario Athletic Association \("CISAA"\) Return to Sport Plan 2020-2021](#), sport activities may be carefully resumed in a phased approach, depending on the nature and risk level of the sport. The safety and health of students, coaches, officials, and families will be at the forefront of all return to sport decisions. All return to sport guidelines are subject to the guidance of the Ontario Ministries of Education and Health, and local public health authorities. They may change on short notice. Modifications to games will likely be necessary, and may include; Individual sports will likely return before team sports, modifications to game play and rules may be necessary and required, and students and coaches should be trained on new protocols, and spectators may be limited or not permitted at all.

Lunch Protocols

Students will eat their lunch in their classroom with their cohort to decrease the contact that would have occurred in a lunch room setting. If weather permits, some cohorts may eat outside. Students will be asked to wash their hands before and after eating. No food sharing policy will be enforced.

During COVID-19 microwaves will not be available for student use. Outside food from restaurants or chains may not be delivered into schools since visitors are not permitted in the school during this time.

Field Trips

School staff will only plan virtual field trip experiences until the province has indicated that larger gatherings can take place.

Hygiene and Cleaning

The Planning and Facilities department is responsible for the training of staff and instruction of cleaning requirements. Please refer to: [Public Health Ontario's Environmental Cleaning fact sheet for Public Settings \(PDF\)](#) and [Health Canada's Hard-surface disinfectants and hand sanitizers \(COVID-19\) for approved products](#).

Hand Hygiene

Age appropriate hand hygiene will be reviewed and implemented as hand washing or hand sanitizing is the most effective way to reduce the transmission of organisms. Hand hygiene will be conducted by anyone entering the school and incorporated into the daily schedule at regular intervals during the day, above and beyond what is usually recommended (e.g., before eating food, after using the washroom). No-touch hand sanitation stations will be set up all around the school premises. Please refer to [Public Health Ontario's How to Wash Your Hands \(PDF\) fact sheet](#).

Face coverings

All staff and essential visitors must wear a mask and are responsible for safe use and cleanliness of the mask and proper disposal if using disposable a mask.

Touch Point cleaning

Cleaning will take place in all high contact areas including desks, tables, railings, door handles and other surfaces throughout the school. Cleaning will also take place at the end of each day with high touchpoint surfaces cleaned throughout the day. In addition to routine cleaning, surfaces that have frequent contact with hands will be cleaned and disinfected at minimum three times per day when visibly dirty.

As students and staff return to school, cleaning routines will be based on the advice from Toronto Public Health and directions from the Ministry of Education.

Hand Dryers and Paper Towels

During the initial phase of return to in-person instruction at schools, all electric hand dryers have been marked as out of service, and paper towels are placed in bathrooms.

Classrooms with Water

Classrooms that have a water supply have been provided with hand soap and paper towels.

Cleaning Products

The school will continue to use asthma-safe, hospital-grade green-based cleaning products where available. The caretakers are responsible for: cleaning, sanitizing, and disinfecting. Cleaning involves removing dirt, while sanitizing reduces germs from surfaces up to 99.9%; and disinfectants destroy bacteria and prevent them from spreading.

Sanitizer

Hand sanitizer has been placed at the front entrance of every school and in every class and refilled when supplies are available.

Water Fountains

Water fountains can be used for refilling personal water bottles but have been marked that they should only be used for this purpose and not for taking a drink at this time.

Garbage

Classroom garbage will be collected and disposed of daily. All garbage pails/bins should be lined with plastic bags.

Recycling

The mixing of cohorts is discouraged during the pandemic. For this reason, students will be asked to bring home all containers and recycle in their own home rather than at school. Schools can continue to recycle items such as cardboard boxes from school based deliveries.

Governance and Administration

Board meetings

Schools should plan to continue to convene board meetings and other administrative meetings via online formats during school hours.
